No person shall discharge or cause to be discharged any storm water, surface water, ground water, roof runoff, subsurface drainage, cooling water or unpolluted industrial process waters to any sanitary sewer.

It shall be unlawful to discharge to any natural outlet within the Town, or in any area under the jurisdiction of the Town, any sanitary sewage, industrial wastes, or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this Title.

- B. No person shall discharge or cause to be discharged any of the following water or wastes into any public sewers:
 - 1. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.
 - 2. Any waters containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters for the wastewater treatment plant.
 - 3. Any waters or wastes having a pH lower than 5.5, or having any corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the waste water works.
 - 4. Solid or viscous substances in quantities or of such size as capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the wastewater facilities such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails,

paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

5. The use of the sewer system of the Town, for the disposal of crude oil, refined oil, or any and all other petroleum products, shall be prohibited.

Grease, oil, and sand interceptors shall be provided when, in the opinion of the Town Board, they are necessary for the proper handling of wastes. Where installed, such interceptors shall be maintained by the owner, at his expense, in continuously efficient operation at all times.

Any user discovered to have discharged any toxic pollutants into public sewer facilities, in addition to other penalties as provided by ordinance and law, shall be responsible for all costs associated with treating or otherwise disposing of such pollutants. The owner also shall maintain records of the dates, and the means of disposal, which are subject to review by the Town.

- C. The disposal by any and all persons of garbage, cans, washers, filters and other foreign debris into the sanitary sewer system of the Town shall also be prohibited.
- D. The following described substances, materials, waters, or waste shall be limited in discharges to municipal systems to concentrations or quantities which will not harm either the sewers, wastewater treatment process or equipment, will not have an adverse effect on the receiving stream, or will not otherwise endanger health, public property, or constitute a nuisance. The Town Board may set limitations lower than those established in the regulations below if, in their opinion more severe limitations are necessary to meet the above objectives.

In determining acceptability, the Town Board will give consideration to such factors as the quantity of subject water in relation to flows and velocities in the sewers, materials of construction of the sewers, the wastewater treatment process employed, capacity of the wastewater treatment plant, degree of treatability of the waste in the wastewater treatment plant, and other pertinent factors. The limitations or restrictions on materials or characteristics of waste or wastewaters discharged to the sanitary sewer which shall not be violated without approval of the Superintendent are as follows:

1. Wastewater having a temperature higher than 150° Fahrenheit (65° Celsius).
2. Wastewater containing more than 25 milligrams per liter of petroleum oil, non-biodegradable cutting oils, or product of mineral oil origin.
3. Wastewater from industrial plants containing floatable oils, fat, or grease.
4. Any non-properly shredded garbage, as defined herein. Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurants, hospitals, catering establishments, or similar places where garbage originates from the preparation of food in kitchens for the purpose of consumption on the

- premises or when served by caterers.
5. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances such that as received in the composite wastewater at the wastewater treatment works, it exceeds the limits established by the Town Board for such materials.
 6. Any waters or wastes containing odor-producing substances exceeding limits which may be established by the Town Board.
 7. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Town Board in compliance with applicable state or federal regulations.
 8. Quantities of flow, concentrations, or both which constitute a "slug" as defined herein.
 9. Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction of discharge to the receiving waters.
 10. Any waters or wastes which, by interaction with other water or wastes in the public sewer system, release obnoxious gases, form suspended solids which interfere with the collection system, or create a condition deleterious to structures and treatment processes.
- E. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in 8-2-4 (D), and which, in the judgment of the Town Board, may have a deleterious effect upon the wastewater facilities, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Town Board may:
1. Reject the wastes.
 2. Require pretreatment to an acceptable condition for discharge to the public sewers.
 3. Require control over the quantities and rates of discharge, and/or
 4. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of this chapter.

When considering the above alternative the Town Board shall give consideration to the economic impact of each alternative on the discharger. If the Town Board permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Town Board.

Where pretreatment or flow-equalizing facilities are provided or required for any waters or wastes, they shall be maintained in satisfactory and effective operation by the owner at his expense.

- F. When required by the Town Board, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable structure together with such necessary meters and other appurtenances to facilitate observation, sampling, and measurement of the wastes. Such structure shall be accessible and safely located, and shall be constructed in accordance with plans approved by the Town Board. The structure shall be installed by the owner at his expense, and shall be maintained by him so as to be safe and accessible at all times.

- G. The Utilities Operator may require a user of sewer services to provide information needed to determine compliance with this ordinance. This information may include, but is not limited to:
 - 1. Wastewater discharge peak rate and volume over a specified time period.
 - 2. Chemical analyses of wastewaters.
 - 3. Information on raw materials, processes, and products affecting wastewater volume and quality
 - 4. Quantity and disposition of specific materials important to sewer use control.
 - 5. A plot plan showing sewer and pretreatment facility locations on the user's property.
 - 6. Details of wastewater pretreatment facilities.
 - 7. Details of systems to prevent and control spills of materials into the municipal sewer.

- H. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater" published by the American Public Health Association. Sampling methods, locations, times, durations, and frequencies are to be determined on an individual basis subject to approval by the Utilities Operator.

- I. No statement contained in this chapter shall be construed as preventing any special agreement or arrangement between the Town and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the Town for treatment.

8-2-5 Prohibited Acts. No person(s) shall willfully or negligently damage, destroy, uncover, deface, or tamper with any structure, appurtenance or equipment which is a part of the wastewater facilities.

8-2-6 Powers and Authority of Inspectors.

- A. The Utilities Operator and other duly authorized employees of the Town bearing proper credentials and identification shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling, and testing pertinent

to discharge to the community system in accordance with the provisions of this ordinance.

- B. The Utilities Operator or other duly authorized employees are authorized to obtain information concerning industrial processes which have a direct bearing on the kind and source of discharge to the wastewater collection system. The industry may withhold information considered confidential. The industry must establish that the revelation to the public of the information in question might result in an advantage to competitors.
- C. While performing necessary work on private properties referred to in 8-2-6 (A) above, the Utilities Operator or duly authorized employees of the Town shall observe all safety rules applicable to the premises established by the company, and the company shall be held harmless for injury or death to the Town employees, and the Town shall indemnify the company against loss or damage to its property by Town employees and damages growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in 8-2-4 (F).
- D. The Utilities Operator and other duly authorized employees of the Town bearing proper credentials and identification shall be permitted to enter all private properties through which the Town holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the wastewater facilities lying within said easement. Entry and all subsequent work shall be in accordance with the terms of the easement pertaining to the private property involved.

8-2-7

All owners must, at their own expense, keep their service pipe, from the point of connection with the Town water main, and all other apparatus, in good working order and properly protected from frost or other damage. No reduction will be made from rates because of leaking pipes or fixtures or for any other cause.
- 8-3-6 Discontinuance of Service. Any user desiring discontinuance of water service shall notify the Water Superintendent or Finance Officer prior to the first day of any month and shall continue to be liable for the payment of the water charge until such notice.
- 8-3-7 Premise to Have Separate Connection. Unless special permission is granted by the Water Superintendent, each premise shall have a separate service connection and, where permission is granted for branch service system, each system must have its own separate curb cock.
- 8-3-8 Water Connections. In installing water service, all taps shall be driven, street excavations made, curb cocks inserted, pipes installed from main to curb, and the curb cock installed in an iron box to which the service is to be connected, by a Town employee or by a plumber duly licensed. Owners of buildings who lease or subdivide shall be responsible for all water used in said premises. If more than one (1) meter is placed upon one (1) service pipe, the piping must be arranged such that each meter can be set on separate pipe lines and shall be so placed that no one of them shall measure water which has passed through another meter.

8-3-17 Cutoffs. All stop boxes and cutoffs for controlling the supply of water to consumers shall be placed ten (10) feet from the property line nearest to the main where the tap is to be made with the top of the stop box even with the grade of sidewalk or parking. However, this rule shall not apply where a valve in the street, which is covered by a manhole, controls the water supply. All such cutoffs are under the control of the Town. The user or owner of the premises supplied with water shall be responsible for any damage to the curb-box.

8-3-18 Meter Policy. All places supplied with water shall be metered by a meter furnished by the Town and of a type approved by the Town Board under the direction of the Town Board or its employees. All meters shall be tested before installation and be installed under the direction of the Town Board or its employees.

8-3-19 Placing of Meters and Cutoff Valves. All meters shall be suitably placed on a service pipe with a compression stop and waste on the inlet side and next to the meter so as to be easily accessible and, whenever possible, not to exceed two (2) feet from the wall or place where the service pipe enters the building or structure. The meter shall

be kept free from all obstructions so that the same may be easily read and inspected and shall be protected from freezing or other damage. The cutoff valve shall have a handle or wrench attaching thereto for the purpose of turning the same and must be kept accessible at all times. One (1) inch and larger meters shall have cutoff valves on both inlet and outlet side. Meters of two (2) inch size or larger shall have a tee with one (1) inch opening inserted between meter and stop valve on the outlet side of the meter.

- 8-3-20 Meters Failing to Register. In cases where water meters fail to register the amount of water passing through them by being stopped up or from any cause whatsoever, the quantity used shall be determined and the charge made based upon the average amount used during two (2) or more preceding periods of similar length.
- 8-3-21 Boxes for Meters. All meters located outside of cellars must be placed in boxes. All such outside meter boxes must be constructed of brick, stone, cement or other material other than wood, and be not less than three (3) feet long and two and one-half (2 ½) feet wide, inside measurement, and must be provided with two (2) close-fitting covers so arranged as to provide a dead air space between each cover, and with steps to enable one to descend into the box. The top of the meter box shall be at grade.
- 8-3-22 Damage to Meters. If any water meter owned by the Town shall be damaged while on the premise of a consumer, by carelessness of the owner or occupant, the consumer must pay for the repairs to put said meter in good working condition or purchase a new meter.
- 8-3-23 Breaking Seals. No person shall break any seal upon any meter, valve, private fire hydrant or other fixtures that may be sealed by the direction of the board of Trustees or its employees. Provided that the seals on private fire hydrants and private fire protection valves may be broken in case of fire and when so broken shall be reported to the Town Board within twenty-four (24) hours.
- 8-3-24 Testing Meters. If a consumer doubts the accuracy of any meter, he/she may ask the Maintenance Person to have the meter tested by an outside agency. If the meter is more than five (5) percent fast, proper deductions will be made from the bill from the preceding period. If the water meter is more than five (5) percent slow, the proper amount will be added to the bill. The cost of testing the meter will be borne by the customer if the meter proves to be accurate, the cost of testing the meter shall be borne by the Town if the meter proves to be inaccurate. The fees for testing by an outside contractor will be determined by the contractor.
- 8-3-25 Water Shut off – Repairs. The Town reserves the right to discontinue service to any or all customers of the water system without notice when necessary for repairs. No claim shall be made against the Town by reason of the breaking of any service pipe or apparatus, or for any other damage that may result from shutting off water for repairing or any other purpose, or for any variation in pressure or ram of water from mains.

- 8-3-26 Water Shut off – Expense. When water service has been shut off due to nonpayment of bills or for violation of any of the rules and regulations of the Town, it will not be turned on again until all the arrears are paid together with any additional fees as stated in this Title for shutting off and turning back on. If any person from whose premises the water has been shut off for any of the reasons herein provided shall turn the water on or cause the same to be turned on without authority from the Town Board or its employees, he/she shall be deemed guilty of a misdemeanor.
- 8-3-27 Water Rationing. The Town has the authority to impose water rationing in case of a water shortage or repairs to the water system, on a basis to be determined by resolution of the Town Board. Notice of water rationing may be given to the public by publication of restrictions in the official newspaper, or if possible, by radio or TV announcement at least twenty-four (24) hours in advance of the effective date of such restriction, or by posting a sign stating such at the Roslyn Post Office; and it shall be unlawful for any person, firm, or corporation, to use Town water in the manner or at the times restricted by such resolution.
- 8-3-28 Use of Water during Fires. During the time of fires, the use of water for lawn purposes is prohibited, and any person violating this section is guilty of a misdemeanor.
- 8-3-29 Drilling of Wells.
- A) Drilling prohibited generally. It shall be unlawful for any person to drill a water well for the purposes of extracting water.
- B) Drilling in case of extraordinary or emergency circumstances. In a case of extraordinary circumstances or an emergency making it necessary for such a well to be drilled, and prior to the commencement of drilling, a person may make application to the Town for a drilling permit. The Town Board shall hold a hearing on such application and may, after hearing and upon appropriate findings, authorize the issuance of such a permit. Upon application and hearing, the applicant shall be required to show:
1. That there exists an urgent necessity for the drilling of such well;
 2. That it is impracticable or impossible to obtain the necessary water from other sources and the reasons that the same is impracticable or impossible;
 3. That the applicant will establish and institute such safety standards as shall be desirable and necessary to prevent injury to the health, safety and well-being of the residents, citizens and inhabitants of the Town, and the specific safety standards which the applicant proposes;
 4. That the proposed well will not constitute a breach or violation of the terms and provisions of any subdivision restrictions or restrictive land covenants that may be in force and effect; and
 5. That the proposed well will not represent a potential hazard to residential subdivisions or properties in residential use, either adjoining or abutting the proposed drilling site.

At the time of hearing, the Town Board may inquire into such circumstances and conditions which it may find to exist which either justify the issuance of a permit hereunder or which necessitates the denial of such a permit upon a determination of the likely impact of such drilling on the health, safety and well-being of the residents, citizens and inhabitants of the Town.

- C) Drilling for Town Services Purposes. Nothing herein shall prevent the drilling of necessary wells by the Town or by contractors authorized by the Town as to such drilling for the purposes of providing necessary Town services, or by any lawfully created and existing municipal utility district or other body politic which may be created from time to time and be charged with the function of providing Town service or services customarily provided by the Town.

8-3-30 Penalty: Water. A person who violates this Ordinance is guilty of a separate offense for each day or part of day the violation is committed, permitted, or continues. Each offense, upon conviction, is punishable by a fine set by the Town Board and on file with the Finance Officer.
